

Request for Permission to Duplicate Design Concept

The team at SiteOrganic is currently working on a new Website design for:

Box A **(the client)**

As part of the design phase of the project, the client above has requested that we base their Website's design primarily from the concept shown on your Website, listed here:

Box B

We respect the hard work and creativity that your team has put into your Website. Because our client has asked us to model their site after yours, we want to make sure that you will permit this.

Please take a moment and complete this form, then FAX it to the SiteOrganic team at (703) 889-8934.

Thank you for your help in this matter!

I hereby grant permission to the organization listed above (Box A), and to Edge Media, Inc. (its contractor) to create a new Website that follows the design of my organization's Website, listed above in Box B. I understand that I am not granting permission for any copying of Website text, images, audio, or video content. This permission extends only to the general look, feel, graphic layout, and visual scheme of the Website.
